

Measure, assess, monitor & share provider clinical competency data using Evaluate with CredentialStream®

Provider clinical performance assessment requires fair processes built around relevant, meaningful data and actionable outputs. With Evaluate, you get pre-built process workflows, content templates, and data alignment to support comprehensive, collaborative, and regulatory- and accreditation-compliant Peer Review or Professional Practice Evaluation (PPE) processes.

Why You'll Love It

- Delivers effective, efficient, and equitable evaluation of providers' performance via clear processes, acquired data, defined metrics, and meaningful reporting
- Meets regulatory and accreditation standards for Peer Review or Professional Practice Evaluation (PPE)
 - ✓ Centers for Medicare and Medicaid Services (CMS)
 - ✓ The Joint Commission (TJC)
 - ✓ Det Norske Veritas (DNV)
 - ✓ Accreditation Association for Ambulatory Health Care (AAAHC)
 - ✓ and more
- Honors transparency to build and foster a data-acceptance culture
- Seamlessly incorporates privilege volumes, indicator-based clinical performance, and case review outcomes into both the ongoing/periodic professional practice evaluation and recredentialing processes
- Ingests data from EHRs and other patient-centric data systems to align the provider and patient data sets

Who It's For

- Medical Staff/Credentialing Office
- Quality Department
- Clinical Leadership (Department Chair, Chief Medical Officer, etc.)
- Providers

Performance Privileges

Analyzes provider privilege volumes to ensure competency and mitigate risk:

- ✓ Exercised privilege volumes matched to granted privileges
- ✓ Identification of fallout from minimum volume requirements
- ✓ Flagging of performance of non-granted procedures
- ✓ Comparison of individual provider data to peer data
- ✓ Presentation to providers and reviewers via the Hub

Performance Metrics

Empowers organizations to drive evidence-based performance improvement, while supporting compliance with regulatory and accreditation requirements. Indicators are linked to clinical privileges to answer the two-part question of “how many” and “how well” a provider performs.

Includes all features in Performance Privileges plus:

- ✓ Automated workflow support and reviewer assignment for ongoing/periodic PPE
- ✓ Robust provider reports, including:
 - General and specialty-specific indicators aligned to Accreditation Council for Graduate Medical Education (ACGME) general competencies
 - Peer comparison data
 - Visual cues to excellent and sub-acceptable performance
- ✓ Library of specialty-specific performance indicators curated and maintained by HealthStream's Clinical Solutions team.
- ✓ Supportive of inpatient and outpatient (e.g. ED, Observation, Clinic, etc.) care settings
- ✓ Sources include CMS (MIPS, CQM measures), Agency for Healthcare Research and Quality (AHRQ PSI, IQI, NQI), and more
- ✓ Customer-configured indicator support

Case Review

Champions healthcare organizations to effectively track, document, and share case review activities from initial screening through committee determination.

- ✓ Support of peer/case review on a routine and/or triggered basis
- ✓ Automated notifications to all stakeholders
- ✓ Best-practice content templates for reviewers
- ✓ Customer-configured workflows
- ✓ Functionality to support Attributing Provider input
- ✓ Presentation to reviewers via the Hub
- ✓ Reduced manual data entry and increased data accuracy via available patient data
